

## Markers MP 990

### Product description

The MP990 Markers marker printer is used to print markers on RP flat profiles, KT heat-shrink sleeves and self-adhesive labels 6,9,12 mm - TSP (white, yellow, silver)

The latest Markers model is even faster and more efficient, improved with battery power and software that allows you to transfer data from Excel using the "copy - paste" function.

|                                |                                             |
|--------------------------------|---------------------------------------------|
| Szybkość druku:                | 18.5 mm/s - normalny tryb pracy dla profili |
| Maksymalna ilość linii tekstu: | 4                                           |
| Współpraca z komputerem::      | tak                                         |
| Rozdzielczość druku:           | rozdzielczość 300 dpi                       |
