

MOK41060 Oznacznik kablowy 10x60 mm żółty, 335 szt

Product description

MOK is a flat profile made of soft plastic with embossed holes for mounting ties. The markers are perforated for easy tearing. It is supplied on rolls of fixed lengths of 20 meters, with each roll containing 205 to 505 markers, depending on the marker length. The material can be printed using Markers ZD420, Citizen, or MK10 printers, or you can order ready-made markers made according to a previously submitted specification. The material has excellent durability in harsh environments and is resistant to UV radiation and chemicals.

The soft plastic, according to the Marker formula, is non-flammable, self-extinguishing, and complies with the UL94-V0 standard.

Operating temperature: -40°C / +90°C

Meets the requirements of energy companies such as Enea, PGE, and Tauron, etc., for cable and terminal marking due to its compliance with standards and the required thickness of 1 mm.
