

MOK91060 Cable marker, length 10 x 60 mm white 335 pcs

Product description

MOK is a flat profile made of soft plastic with embossed holes for mounting ties. The markers are connected with perforation for easier tearing off, it is delivered on rolls of a fixed length of 20 m, one roll contains from 205 to 505 markers depending on the marker length. The material can be printed with Markers ZD420, Citizen or MK10 printers or you can order ready-made markers made according to the previously sent specification. The material has excellent durability in harsh conditions and resistance to UV radiation and chemicals.

Soft plastic according to Marker recipe, non-flammable, self-extinguishing, in accordance with UL94-V0 standard

Working temperature from -40°C / +90°C
